

Film analysis: cinematic devices

Task:

On your own, which shots, angles and movement would you use for which image?

Only work on the even/uneven numbers. When you are done match with someone who worked on the other numbers and exchange and explain your results.

1. raindrops on a window:

2. couple sitting at a table:

3. petal¹ of beautiful flower:

4. full moon:

5. boy and girl kissing:

6. people crossing a street:

7. a child crying:

8. neighbours talking over the fence:

9. an ice skater:

10. woman on the phone:

11. happiness:

12. football that is kicked the whole length of a pitch:

¹petal = Blumenblatt
